

Definition and Application of Servis Clamp

It is used to direct the cell wrench to the hidden extension valve. It can be provided for extension liens of 1.2-2 inches. The cap and body are made of gray cast according to 1691 DIN Standard. The interior pipe is made of iron and galvanized in interior area. The core of the cap is made of forged or polymeric brass. It is installed outside the subscribers' property, hidden and mounted on on-off valve.

CURB VALVE BOX
